African Bank Limited

African Bank Holdings Limited and African Bank Limited Public Pillar III Disclosure

In terms of the Banks Act, Regulation 43
for quarter ended 30 June 2024

CONTENTS

1. EXECUTIVE SUMMARY

1.1. Overview

African Bank Holdings Limited (ABHL) is a public company incorporated in the Republic of South Africa. ABHL is an unlisted registered bank controlling company under the Banks Act.

The shares in ABHL are privately held by the South African Reserve Bank ("SARB") (50.00%), the Government Employees Pension Fund (25.00%), FirstRand Bank Limited (6.55%), The Standard Bank of South Africa Limited (5.95%), Absa Trading and Investments Solutions Proprietary Limited (4.95%), Nedbank Limited (4.10%), Investec Bank Limited (2.45%) and Capitec Bank Limited (1.00%). Percentages indicate percentage holding.

ABHL holds 100% of the issued share capital of African Bank Limited (ABL). ABL holds 100% of the ordinary share capital of Grindrod Financial Holdings Limited (GFH) and 100% of the preference shares of Grindrod Bank Limited (GBL), which is a 100% held subsidiary of GFH. ABL acquired its ordinary shareholding and its preference shareholding in the prior financial year. As a result of the acquisition, ABHL indirectly holds 100% of GFH and its subsidiaries ("GFH Group"). In the prior financial period, an application was submitted to the Prudential Authority to transfer the business activities within the GFH Group into ABL and ultimately deregister the legal entities within the GFH Group. The Group received the written approval from the Minister of Finance through the Prudential Authority on 14 March 2024. The transfer was concluded on 1 August 2024, and Grindrod Bank's SSETS, liabilities and operations have been divisionalised into ABL with effect from that date.

ABHL also holds 100% of the issued share capital of African Insurance Group Limited (AIG). Its main business is holding an investment in a cell captive arrangement provided by Guardrisk Insurance Company Limited ("Guardrisk").

The Group's business operations consist of Personal Banking and Business and Commercial Banking. The core product offering for Personal Banking consists of unsecured lending (personal loans and credit cards), transactional banking (including overdrafts) and retail investments. The Group, through AIG's investment in a cell captive, is able to sell insurance products (credit life and funeral cover insurance products) under its own brand. These insurance products are provided to the Bank's Personal Banking customers. Business and Commercial Banking offers a range of products, including Commercial Property Finance, Corporate/SME & Investment Banking Division, Trader Segmemnt Coverage and New Business Development.

In line with the Excelerate25 Group strategy, the Balance Sheet of African Bank and the African Bank Holding Limited now reflects a diversifying and scaling operation, with advances appropriately provided for, a strong capital adequacy position and adequate cash resources of R8.4 billion at the group level. Liquidity, interest rate and foreign exchange risks are managed within the Group's approved risk appetite framework.

The key prudential ratios as at 30 June 2024 for both, ABH and ABL, operate well above minimum required regulatory levels. These have been detailed in the report below.

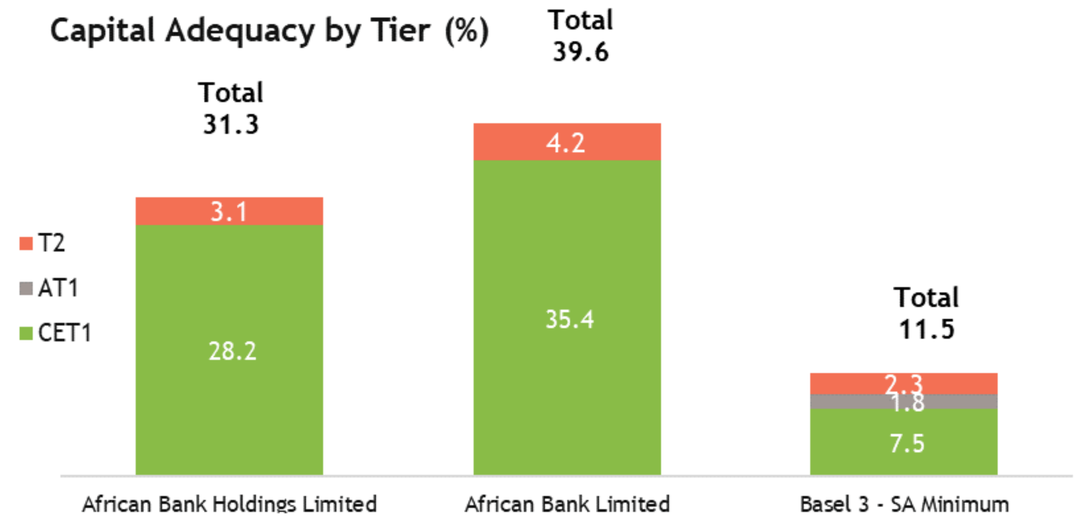
1.2. Governance

This Pillar III disclosure report complies with the Prudential Authority's requirements as stipulated by the Banks Act (Act No. 94 of 1990), and through the relevant regulations, directives and guidance notes issued, with specific reference to Directive D1 of 2019.

The Board is satisfied that the information provided in this document has been prepared and reviewed in line with the Bank's approved control framework. The information provided in this report was subject to a similar and appropriate level of internal review as the information provided for financial reporting purposes.

1.3. Capital adequacy ratios

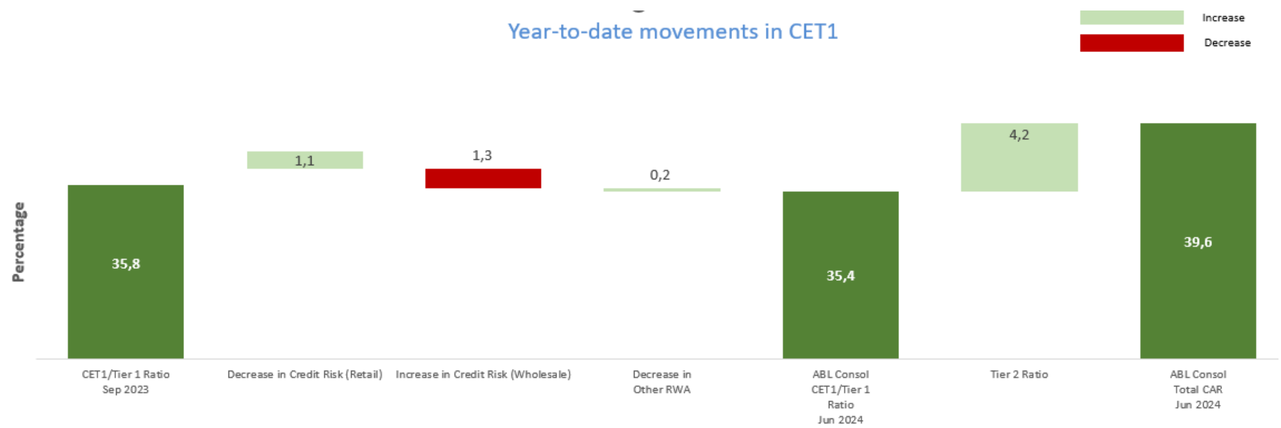
The capital adequacy ratios and qualifying regulatory capital for ABH and ABL as at 30 June 2024 are set out in the graph and table below. The Group remains well capitalised with CET1 and Tier 1 ratios of 28.2% and 35.4% at a consolidated Group and Bank level respectively. The corresponding total capital adequacy ratios are 31.3% and 39.6% respectively.



YEAR-TO-DATE CET1/TIER 1 ANALYSIS

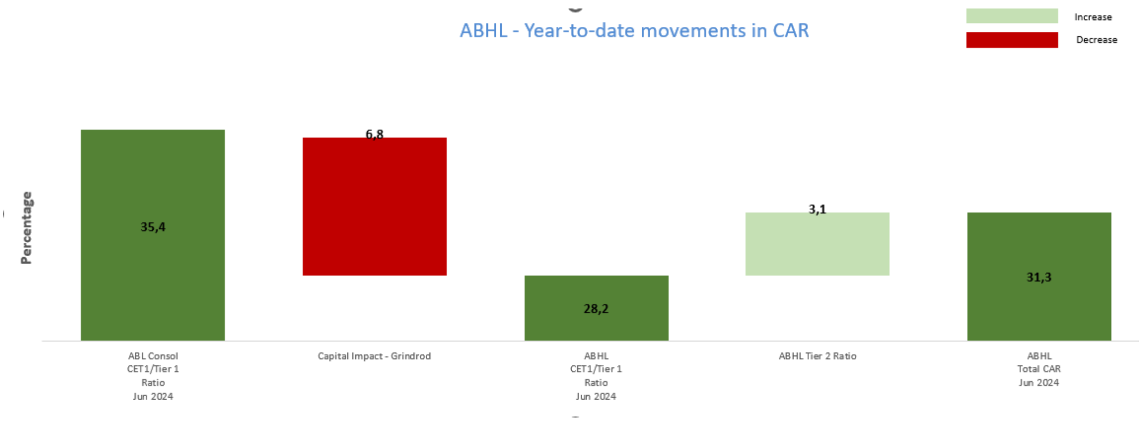
An analysis of the change in African Bank Limited's CET1 capital adequacy ratio movement from 30 September 2023 to 30 June 2024.

African Bank Limited (Bank Solo)



CET1/Tier1 ratio from 30 September 2023 to 30 June 2024 remained relatively flat. The increase in total capital adequacy ratio was due to increase in capital supply resulting from a new issuance of Tier 2 instruments in December 2023.

REGULATORY CAPITAL BUILD-UP FROM ABL TO ABHL



The above graph reflects the movement from ABL total ratio to ABHL CET1/Tier1 and Total CAR.

The following table sets out the composition of the qualifying regulatory capital for ABH and ABL:

	African Bank Holdings Limited		African Bank Limited	
R million	Jun-24	Mar-24	Jun-24	Mar-24
Composition of qualifying regulatory capital				
Ordinary share capital & accumulated profit	11 619	11 922	14 187	14 049
Regulatory adjustments	(884)	(743)	(5 338)	(5 068)
Common Equity Tier 1 capital (CET1)	10 735	11 179	8 848	8 981
Total qualifying subordinated debt	-	-	-	-
Tier 2 capital instruments issued	828	828	828	828
General allowance for credit impairment:	352	350	230	224
Tier 2 capital (T2)	1 180	1 179	1 059	1 052
Total Qualifying regulatory capital	11 916	12 357	9 907	10 033

(1) Refer to 7.2 for detailed disclosure of the above table.

1.4. Leverage ratio

The Basel III leverage ratio is defined as the capital measure (Tier 1 capital) divided by the total exposure measure (total exposures) and is expressed as a percentage. This prudential ratio acts as a backstop to the risk-based capital adequacy ratio, by acting to restrict the build-up of excessive leverage by banks.

The movement in the leverage ratio at an ABL level between March 2024 and June 2024 resulted from the decrease in Tier 1 Qualifying Capital and an increase in the Total exposure measure. The decrease in the Tier 1 Qualifying Capital was mainly due to regulatory capital adjustments partially offset by ABL recapitalisation from ABHL. The movement in the Total exposure was mainly due to increased on-balance sheet exposures. The marginal decrease in the ABHL Leverage ratio was due to an increase in on-balance Total exposures.

	African Bank Holdings Limited		African Bank Limited	
R million	Jun-24	Mar-24	Jun-24	Mar-24
Capital and total exposures				
Tier 1 capital	10 735	11 179	8 848	8 981
Total exposures	50 674	49 255	35 540	34 380
Basel III leverage ratio	**21,2%**	**22,7%**	**24,9%**	**26,1%**
Basel III leverage ratio regulatory minimum requirement	**4,0%**	**4,0%**	**4,0%**	**4,0%**

Refer to 8.2 for detailed disclosure of the above table.

1.5. Liquidity coverage ratio ("LCR")

The LCR is a prudential ratio which incorporates a 30-day stress test, requiring the Bank to hold sufficient high-quality liquidity assets (HQLA) to cover envisaged net outflows. These outflows are calibrated using regulatory prescribed factors applied to assets and liabilities in a static run-off model. Regulatory definitions are used to identify high-quality liquid assets.

The decrease in the ABL LCR from the previous reporting period was largely due to a decrease in weighted average High Quality Liquid Assets (HQLA) for the reporting quarter ended 30 June 2024, whereas the increase in the ABHL LCR was mainly due to the decrease in the weighted average net cash outflows.

African Bank Limited	Total weighted value (average)	Total weighted value (average)
R million	Jun-24	Mar-24
Total high-quality liquid assets	3 631	4 836
Total net cash outflows	619	575
Liquidity coverage ratio (%)	**586%**	**841%**
Regulatory minimum requirement	100%	100%

African Bank Holdings Limited	Total weighted value (average)	Total weighted value (average)
R million	Jun-24	Mar-24
Total high-quality liquid assets	8 710	9 726
Total net cash outflows	1 314	1 823
Liquidity coverage ratio (%)	**663%**	**534%**
Regulatory minimum requirement	100%	100%

Refer to 9.5 for detailed disclosure of the above table.

ABL has included the GBL Liquidity ratios in the Bank Group LCR in the above table.

1.6. Net stable funding ratio ("NSFR")

The NSFR is determined as the amount of available stable funding relative to the amount of required stable funding, over a one-year period. This ratio is required to be greater than or equal to 100% on an on-going basis.

"Available stable funding" is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of such stable funding required of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance sheet exposures.

The NSFR is designed to ensure closer matching of long-term asset cash flows with long-term funding cash flows. Full compliance for the NSFR became effective since January 2018.

The decrease in NSFR of 2% from 31 March 2024 to 30 June 2024, is driven by an increase in required stable funding. The increase in the required stable funding is attributable to the movement in on and off-balance sheet required stable funding items.

African Bank Limited R million	Jun-24	Mar-24
NSFR (%)	**138%**	**140%**
Available stable funding	29 787	29 474
Required stable funding	21 657	21 074

(1) *Refer to 10.6 for detailed disclosure of the above table.*

1.7. References of quantitative standardised tables and templates

Refer to the attached Annexure A to this document for the quantitative standardised tables and templates as prescribed in the revised pillar 3 disclosure requirements published in January 2015 and pillar 3 disclosure requirements – consolidated, enhanced framework published in March 2017 by the Basel Committee on Banking Supervision; and Regulation 43 of the Regulations relating to Banks (Regulations), issued in terms of the Banks Act 94 of 1990, Directive D1/2019 on Matters related to Pillar III disclosure requirement framework and all other Pillar III disclosure related directives issued by the Prudential Authority (PA).

2. BASIS OF COMPILATION

The information contained in this report is based on the month-end actual results and, in some instances, the average balances as contained in the ABH and ABL regulatory returns. Accordingly, this information may not agree to the information contained in the respective sets of Financial Statements, which are prepared on an IFRS basis.

The table below shows an analysis of advances to customers for ABL as at 30 June 2024 and is included as a reference to the published Financial Statements.

Analysis of advances to customers as at 30 June 2024

R million	Term loans (2)	Credit Cards / Overdrafts (3)	Total
Gross amount due by customers	22 761	8 883	31 644
Impairment attributable to acquired advances and deferred fees	(752)	(7)	(759)
Gross advances	**22 009**	**8 875**	**30 885**
Impairment and deferred fees attributable to originated advances	(7 887)	(1 856)	(9 744)
Net advances	**14 122**	**7 019**	**21 141**

(1) The above table provides a breakdown of loans and advances related to corporate loans, credit cards, overdrafts, and term loans only and excludes interbank and sovereign exposures.
(2) Included in the term loans is an exposure of R1.9 billion gross amount relating to corporate exposure.
(3) Retail credit card has an exposure of R8.7billion and overdrafts of R125million.

3. SUPPLEMENTARY INFORMATION INCLUDING RISK MANAGEMENT

Additional information providing context for disclosures contained herein is included in the following documents published by the ABH Group, available on the investor relations page of the Group's website: https://www.africanbank.co.za.

- Risk management (Note 24)
- Credit risk management including approach to impairment provisioning (Note 25)
- Market risk (Note 26)
- Interest rate risk management (Note 26.1)
- Foreign exchange risk management (Note 26.3)
- Liquidity risk (Note 27)

3.1. Stress testing

In addition to the risk management approach notes as indicated above, the Group has in place a stress testing policy, the objective of which is to provide a coherent and consistent methodology to assess the Group's ability to survive a spectrum of severe stress conditions and scenarios, whilst maintaining the minimum required capital adequacy and liquidity positions.

The primary objective of the Group's stress testing program is to provide useful and relevant information and analyses to senior management and the Board, relating to its financial strength during stressed macro-economic conditions and other adverse systemic or idiosyncratic scenarios. These factors have the potential to impact the Group's sustainability and performance, primarily as measured through the impact on solvency and liquidity.

The stress testing program is used as a tool to allow senior management and the Board to develop a sustainable strategy in line with its risk appetite and with the correct level of risk mitigation, be it capital allocation, contingency funding plans or other interventions.

In order to meet this objective, African Bank's stress testing and scenario analysis program considers the following:

- African Bank's existing risk profile and the expected risk profile based on its strategic plan;
- African Bank's financial, capital management and asset & liability management plans; and
- African Bank's financial risk appetite statement as well as its associated parameters and tolerances.

The stress testing program is built on a methodology that targets an enhanced understanding of the material risks facing the Group in order to improve sustainability and profitability.

The board identifies the Group's key risks through the Enterprise Risk Management (ERM) Framework. The risk appetite for each key risk is reviewed and approved by the Board to enable informed risk-based decision-making. The scenarios used in the Group's stress testing program, including the ICAAP and Recovery Plan, are devised with this board assessment in mind. These stress scenarios cover idiosyncratic and macro-economic stress scenarios which can be fast-moving or slow-moving scenarios. An enterprise-wide stress test approach is used for the ICAAP and Recovery planning, whereby various business such as IT, Credit, Treasury, ERM and other operational business units provides input into the stress scenarios. The ICAAP primarily focusses on the impact of macro-economic stress scenarios on the Group. The Recovery plan can be regarded as an extension of the ICAAP and therefore incorporates more severe stress scenarios which also include reverse stress testing.

4. PERIOD OF REPORTING

This report is prepared as at 30 June 2024 for the ABH Group and its 100% held banking subsidiary, ABL.

5. SCOPE OF REPORTING

This report contains capital adequacy information for ABH and its 100% held banking subsidiary, ABL. The further disclosures for ABL include the leverage ratio, the liquidity coverage ratio, credit disclosures, liquidity disclosures and foreign exchange exposures, and materially reflect the position of the ABH Group.

All subsidiaries are consolidated in the same manner for both accounting and regulatory reporting purposes. All companies are incorporated in the Republic of South Africa. The registered banking subsidiary of the Group, ABL, had acquired GBL as its subsidiary during the 2023 financial year. The disclosures contained in this document reflect the impact of GBL in the relevant ABHL Group disclosures.

6. OVERVIEW OF RISK MANAGEMENT, KEY PRUDENTIAL METRICS AND RWA

The following table presents a summary of key prudential metrics related to regulatory capital, leverage ratio and liquidity. Banks are required to disclose each metric's value using the corresponding standard's specifications for the reporting period-end (designated by “T” in the template below) as well as the four previous quarter-end figures (T-1 to T-4). Please note that the table below reflects the capital and leverage position at an ABH Group level, whilst the LCR and NSFR are reported at a Bank level.

6.1. KM1 – Key metrics

	Period ended:	Jun-24	Mar-24	Dec-23	Sep-23	Jun-23

(1) Credit Risk RWA breakdown excluding Counterparty credit, CVA & Equity Risk RWA.

7. COMPOSITION OF CAPITAL

The capital adequacy ratios and qualifying regulatory capital for ABH and ABL as at 30 June 2024 are set out in the table below. The Group remains well capitalised with CET1 and Tier 1 ratios of 28.2% and 35.4% at a consolidated Group and Bank level respectively. The corresponding total capital adequacy ratios are 31.3% and 39.6% respectively.

7.1. Composition of regulatory capital

(2) *A significant portion of the regulatory adjustment includes accumulated losses for ABL (refer 7.3 below).*
(3) *The amount excludes unappropriated profits.*

8. LEVERAGE RATIO

Public disclosure of the leverage ratio (calculated using the prescribed leverage ratio template) and its components has been required since 1 January 2015. See section 6 above for an overview of this ratio.

The movement in the leverage ratio at an ABL level between March 2024 and June 2024 resulted from the decrease in Tier 1 Qualifying Capital and an increase in the Total exposure measure. The decrease in the Tier 1 Qualifying Capital was mainly due to regulatory capital adjustments partially offset by ABL recapitalisation from ABHL. The movement in the Total exposure was mainly due to increase on-balance sheet exposures. The marginal decrease in the ABHL Leverage ratio was due to an increase in on-balance Total exposures.

The exposure used in the calculation of the ratio (see 8.2) differs from the total assets as measured using IFRS as shown below. The disclosures are prepared using figures as at 30 June 2024.

8.1. LR1 - Summary comparison of accounting assets vs leverage ratio exposure measure

Line #	R million	African Bank Holdings Limited		African Bank Limited	
		Jun-24	Mar-24	Jun-24	Mar-24
1	Total consolidated assets as per published financial statements	48 694	47 166	33 789	32 888

9. LIQUIDITY MEASUREMENTS

9.1. Liquidity management

Liquidity risk is managed by the Group Asset and Liability Committee (ALCO) that oversees the activities of the Treasury department which operates in terms of an approved Assets and Liabilities Management (ALM) risk appetite policy and approved limits, managing cash on a centralised basis. The Group has a board approved Liquidity and Funding Risk Policy that sets out the overall approach to liquidity and funding risk management of ABH Group and its subsidiaries, excluding the African Insurance Group Limited. This policy standardises the liquidity and funding risk measurement and management process in the Group. While the Policy applies to the Group and all entities within the Group, the overwhelming majority of liquidity and funding activities occur within ABL.

This section presents various measurements of the Group liquidity position. Further detail regarding liquidity risk is given in Note 31 to the ABL audited annual financial statements for the year ended 31 September 2023.

9.2. Liquidity and funding strategy

The Group's strategy is to diversify its' funding towards achieving a greater proportion of retail funding relative to wholesale funding. As at 30 June 2024 the Group received 84% of its total funding from retail depositors.

The Group has a conservative liquidity risk appetite, holding cash reserves greater than or equal to 6 months of expected net cash outflows, including operational cash flows and contractual maturities. Under this scenario, which is effectively a stress scenario, the Group does not expect to roll any maturing wholesale deposits.

Further stress tests are applied whereby key inputs into the cash flow forecast are stressed. Appropriate management actions are formulated to address these liquidity stresses.

Liquidity risk is recognised as a key risk that impacts the going concern stages of the Group. The directors have satisfied themselves that the Group is in a sound financial position and had sufficient cash reserves to meet all its short term and medium cash requirements as of 30 June 2024.

Off balance sheet items

The following off balance sheet items will result in a future cash outflow subsequent to reporting date. These cash flows are regarded as transactions relating to future reporting periods and are therefore excluded from the static maturity analysis above. As a going concern, these outflows will be offset by future cash inflows.

(a) Committed undrawn credit card facilities totalled R913 million. These commitments are attributable to Consumer Banking undrawn credit card amounts. Group undrawn commitments including Business Banking totalled R1.126million.

(b) Uncommitted undrawn overdraft facilities totalled R9.9 million. These commitments are attributable to undrawn overdraft amounts. Group uncommitted undrawn including Business Banking of R424 million.

(a) Letter of guarantees to Consumer and Business Banking clients amounted to R244million and R813million respectively.

9.5. LIQ1 - Liquidity coverage ratio (LCR)

The LCR is a 30-day stress test, which requires the Bank to hold sufficient high-quality liquid assets (HQLA) to cover envisaged net outflows. These outflows are calibrated using prescribed Basel factors applied to assets and liabilities in a static run-off model. Basel definitions are used to identify high-quality liquid assets.

The decrease in the ABL LCR was largely due to a decrease in weighted average High Quality Liquid Assets (HQLA) for the reporting quarter ended 30 June 2024, whereas the increase in the ABHL LCR was mainly due to the decrease in the weighted average net cash outflows.

	African Bank Limited R million	Total unweighted value (average) (1)	Total weighted value (average) (1)	Total weighted value (average) (1)
		Jun-24	Jun-24	Mar-24
1	**Total high-quality liquid assets (HQLA) (see 10.5.1)**	**3 631**	**3 631**	**4 836**
	Cash outflows			
2	**Retail deposits and deposits from small business customers, of which:**	**17 081**	**887**	**921**
3	Stable deposits	-	-	-
4	Less-stable deposits	17 081	887	921
5	**Unsecured wholesale funding, of which:**	**1 224**	**1 223**	**1 119**
6	Operational deposits (all counterparties) and deposits in networks of cooperative banks	-	-	-
7	Non-operational deposits (all counterparties)	-	-	-
8	Unsecured debt	1 224	1 223	1 119
9	Secured wholesale funding	-	-	-
10	**Additional requirements, of which:**	-	-	**-**
11	Outflows related to derivative exposures and other collateral requirements	2 085	257	155
12	Outflows related to loss of funding on debt products	-	-	-
13	Credit and liquidity facilities	1 212	74	64
14	Other contractual funding obligations	726	36	43
15	Other contingent funding obligations	-	-	-
16	**Total cash outflows**	**22 329**	**2 478**	**2 301**
	Cash inflows			
17	Secured lending (e.g. reverse repos)	-	-	-
18	Inflows from fully performing exposures	2 868	2 411	1 854
19	Other cash inflows	-	-	50
20	**Total cash inflows**	**2 868**	**2 411**	**1 903**

		Total Adjusted Value	Total Adjusted Value
21	**Total HQLA**	**3 631**	**4 836**
22	**Total net cash outflows (2)**	**619**	**575**
23	**Liquidity coverage ratio (%) (3)**	**586%**	**841%**

(1) The average numbers are calculated using the daily LCR figures for the quarter ended 30 June 2024.

(2) ABL has a net cash inflow after applying the run-off factors, outflows for the purpose of the ratio are therefore deemed to be 25% of gross outflows as prescribed through Regulation 26 of the Banks Act.

	African Bank Holdings Limited R million	Total unweighted value (average) (1)	Total weighted value (average) (1)	Total weighted value (average) (1)

22	**Total net cash outflows (2)**		**1 314**	**1 823**
23	**Liquidity coverage ratio (%) (3)**		**663%**	**534%**

9.5.1. Composition of high-quality liquid assets

High-quality liquid assets include only those assets with a high potential to be converted easily and quickly into cash. There are three regulatory-prescribed categories of high-quality liquidity assets: level 1, level 2A and level 2B assets.

African Bank Limited (R million)	Jun-24	Mar-24
Total level one qualifying high-quality liquid assets (1)	**3 631**	**4 836**
Cash	82	164
Qualifying central bank reserves	1 281	1 432
Specified debt securities issued in Rand by the central government of the RSA or the Reserve Bank	2 269	3 240

(1) ABL does not have any investments in level two high-quality liquid assets.

African Bank Holdings Limited (R million)	Jun-24	Mar-24
Total level one qualifying high-quality liquid assets (1)	**8 710**	**9 726**
Cash	416	477
Qualifying central bank reserves	3 173	3 066
Specified debt securities issued in Rand by the central government of the RSA or the Reserve Bank	5 121	6 182

9.6. LIQ2 - Net stable funding ratio (NSFR)

The NSFR is defined as the amount of available stable funding relative to the amount of required stable funding, over a one-year period. This ratio is required to be greater than or equal to 100% on an on-going basis.

"Available stable funding" is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of such stable funding required of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance sheet exposures.

The NSFR is designed to ensure closer matching of long-term asset cash flows with long-term funding cash flows. Full compliance for NSFR became effective since January 2018.

The decrease in NSFR of 2% from 31 March 2024 to 30 June 2024, is driven by an increase in required stable funding. The increase in the required stable funding is attributable to the movement in on and off-balance sheet required stable funding items.

	R million	Unweighted value by residual maturity				Weighted value (1)
	Available stable funding (ASF) item	**No maturity**	**<6 months**	**6 months to <1 year**	**≥1 year**	**Total**
1	Capital:	12 449	-	-	-	12 449
2	*Regulatory capital*	12 449	-	-	-	12 449
3	*Other capital instruments*	-	-	-	-	-
4	Retail deposits and deposits from small business customers:	-	8 396	2 339	6 668	16 515
5	*Stable deposits*	-	2 867	816	2 375	5 874
6	*Less stable deposits*		5 530	1 523	4 293	10 641
7	Wholesale funding:		1 718	275	322	824
8	*Operational deposits*	-	-	-	-	-
9	*Other wholesale funding*	-	1 718	275	322	824
10	Liabilities with matching interdependent assets	-	-	-	-	-
11	Other liabilities:	-	1 852	-	-	-
12	*NSFR derivative liabilities*		-	-	-	-
13	*All other liabilities and equity not included in the above categories*	-	1 852	-	-	-
14	**Total ASF**					**29 787**

(1) The weighted value is determined by applying a prescribed percentage to the gross or unweighted value as per the applicable requirements. The percentage applied is determined by the nature and maturity of the applicable balance.

	R million	Unweighted value by residual maturity				Weighted value [1]
	Required stable funding (RSF) item	No maturity	<6 months	6 months to <1 year	≥1 year	Total
15	Total NSFR high-quality liquid assets ("HQLA")					151
16	Deposits held at other financial institutions for operational purposes	-	-	-	-	-
17	Performing loans and securities:		6 433	4 745	9 930	13 716
18	*Performing loans to financial institutions secured by Level 1 HQLA*	-	-	-	-	-
19	*Performing loans to financial institutions secured by non-Level 1 HQLA and unsecured performing loans to financial institutions*	-	896	-	-	134
20	*Performing loans to non-financial corporate clients, loans to retail and small business customers, and loans to sovereigns, central banks and PSEs, of which:*	-	5 537	4 745	9 930	13 582
21	*With a risk weight of less than or equal to 35% under the Basel II standardised approach for credit risk*	-	-	-	-	-
22	*Performing residential mortgages, of which:*	-	-	-	-	-
23	*With a risk weight of less than or equal to 35% under the Basel II standardised approach for credit risk*	-	-	-	-	-
24	*Securities that are not in default and do not qualify as HQLA, including exchange-traded equities*	-	-	-	-	-
25	Assets with matching interdependent liabilities	-	-	-	-	-
26	Other liabilities:	-	-	-	-	-
27	*Physical traded commodities, including gold*	-	-			-
28	*Assets posted as initial margin for derivative contracts and contributions to default funds of CCPs*	-	-	-	-	-
29	*NSFR derivative assets*	-	-	-	-	-
30	*NSFR derivative liabilities before deduction of variation margin posted*	-	-	-	-	-
31	All other assets not included in the above categories	-	-	-	7 683	7 683
32	Off-balance sheet items	-	2 136	-	-	107
33	***Total RSF***					**21 657**
34	***Net Stable Funding Ratio (%)***					**138%**

10. QUALITATIVE DISCLOSURES AND ACCOUNTING POLICIES

The regulations require that certain qualitative disclosures and statements on accounting policy be made. These were made in the annual financial statements and integrated annual report for the financial period ended 30 September 2023, in the remuneration report, corporate governance and risk management review and statements on group accounting policy. The disclosures in this report should be read together with the integrated annual report and transitional Basel templates. These disclosures can be found on the ABL website under investor relations, financial reporting.

ANNEXURE A

**The Group has disclosed the PVA adjustment reported in line 203 of the form BA700 on the Regulatory capital adjustment tables. PVA disclosure Tables for Pillar III reported on an annual basis.*
