

31 January 2020

RESIDUAL DEBT SERVICES LIMITED ("RDS") - STUB INSTRUMENTS FACE VALUES

Introduction

The exchange offer, as detailed in the Offering Information Memorandum ("OIM") issued on 4 February 2016, was successfully implemented on 4 April 2016. The OIM, inter alia, detailed the creation of a new bank (African Bank Limited) and the transfer of the core assets and business to the new African Bank Limited, which received an injection of R10 billion from its new parent, African Bank Holdings Limited (the "Transaction").

The material liabilities of Residual Debt Services Limited ("RDS") were exchanged, as part of the Transaction, for new instruments held in African Bank Limited, together with certain residual claims on the assets of RDS – "senior stub instruments" and "sub-ordinated stub instruments" and a partial cash settlement.

Stub instruments' carrying values

In terms of the exchange offer executed on 4 April 2016, three distinct tranches of stub instruments were issued with specific terms and conditions and applicable term sheets.

In order to assist holders of the various types of stub instruments to calculate their contractual carrying values for their respective holdings, the detailed calculations below have been provided for this purpose. The three categories of stub instruments are:

1. Transferable senior stub instruments (ZAU000014557) with an original nominal value of R3 972 899 102 and an interest commencement date of 10 August 2014;
2. Non-transferable senior stub instruments (ZAU000014540) with an original nominal value of R1 326 100 and an interest commencement date of 10 August 2014; and
3. Transferable subordinated stub instruments (ZAU000014532) with a nominal value of R3 620 892 415 and an interest commencement date of 4 April 2016.

Please note that the values disclosed are the contractual carrying values and **do not** necessarily represent the fair values or market values of these instruments.

Senior stub holders (transferable and non-transferable) instruments issued as part of the exchange offer effected on 4 April 2016 represent their proportionate share of the total transferable instrument value of R3 972 899 102 and total non-transferable instrument value of R1 326 100 respectively, being the nominal values as at 10 August 2014. These original nominal values have subsequently been reduced as a result of the senior stub payments, which took place from July 2019 onwards, being part interest payments and part return of the original nominal values. As at 29 January 2020, the adjusted nominal values of the transferable instrument is now R3 559 337 470, while the non-transferable instrument is R1 188 059. So for example if you have a holding of R1 000 000 transferable senior stub instruments (ZAU000014557), your holding has a contractual face value of R1 000 786 (R1 000 000/3 559 337 470 multiplied by R3 562 136 532 (31 January 2020 total face value after taking into account the various stub payments and return of capital which has taken place every 6 months starting January'18)).

The three distinct contractual face values are updated on a monthly basis and posted on the RDS webpage.

Disclaimer:

This release must be read in conjunction with the OIM. Nothing in this statement should be considered to alter the legal terms and conditions agreed to and detailed in the OIM and pursuant to the Transaction. The curator of RDS does not make any representation that all relevant information has been disclosed in this release, nor does he accept any responsibility for the accuracy, completeness, validity or correctness of the statements made in this release or any other document prepared in connection with this release or any omissions therefrom. Holders should seek their own independent financial, legal and tax advice on the merits and on the consequences of this release.
